

I want to state what a hardship this ruling would have on small market owners like me. It is hard enough to try to compete with all the broadcast clusters without adding another financial and technical burden. I am one of the only local owners in the Burlington/Plattsburgh market and frankly can make more money selling the station than by operating. I love the industry, however, and am passionate about proving there still is a place for independent owners. Unfortunately rules and regulations keep being passed or trying to get passed that continue to make that objective more difficult. I hope that the concerns of broadcasters all over the country regarding this idea are listened to. There is absolutely no benefit to anyone in my opinion to taping an entire broadcast day and keeping it for three months. Don't punish an industry for the misbehavior of a slight minority.

Sincerely,  
Paul S. Goldman
